What is the record industry saying about the HTB?

“This group has a lot of talent and tremendous potential. The songs are very good and the vocal talent is excellent.”

-- Neal James (Legendary producer)

“You have a high level of talent...the songs are good...the strong[est] point was...vocals.”

-- Sandalphon Records

What are fans saying?

“Travis is a lyrical genius.” “...greatest and best band ever!” “...like going to a concert.” “It’s like the songs are about me...” “Why would anyone ever want to hear another bad version of *Brown Eyed Girl* again when they could hear an *all original* band like this?” “Every time I hear their song...it rips my heart out of my chest, throws it on the floor, and then lovingly steps on it over and over again!” “...This is **my favorite band in the world!”**

Since 2000, the HTB has been spreading their music across the Midwest. They have played casinos, state fairs, and every smokey little bar on the plains. They have played their music for thousands of fans. And in all that time, they have never once played a song they did not write. They are original, pure, and endlessly loyal to their song writing craft. Come see what you’ve been missing.
